HOW TO REDRAW YOUR WORK PAGE @}- - Lisa - - { @

Sometimes when you did process you will get the result but with some glitches in your design. For erasing all these glitch you must use the "REDRAW" function. This tutorial will show you how to use the "REDRAW" function. By doing so the software will redraw your working area erasing all the glitches.

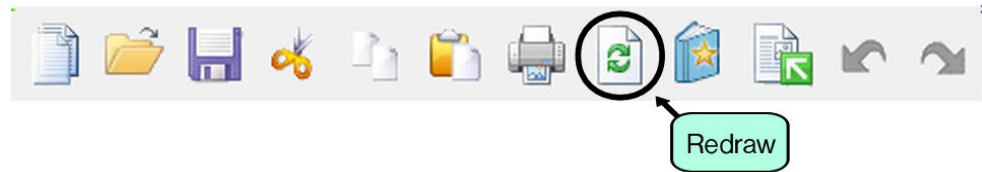

STEP 1

After execution a function you will see a glitches in your design.
In these example I have use the “PRINT” function.

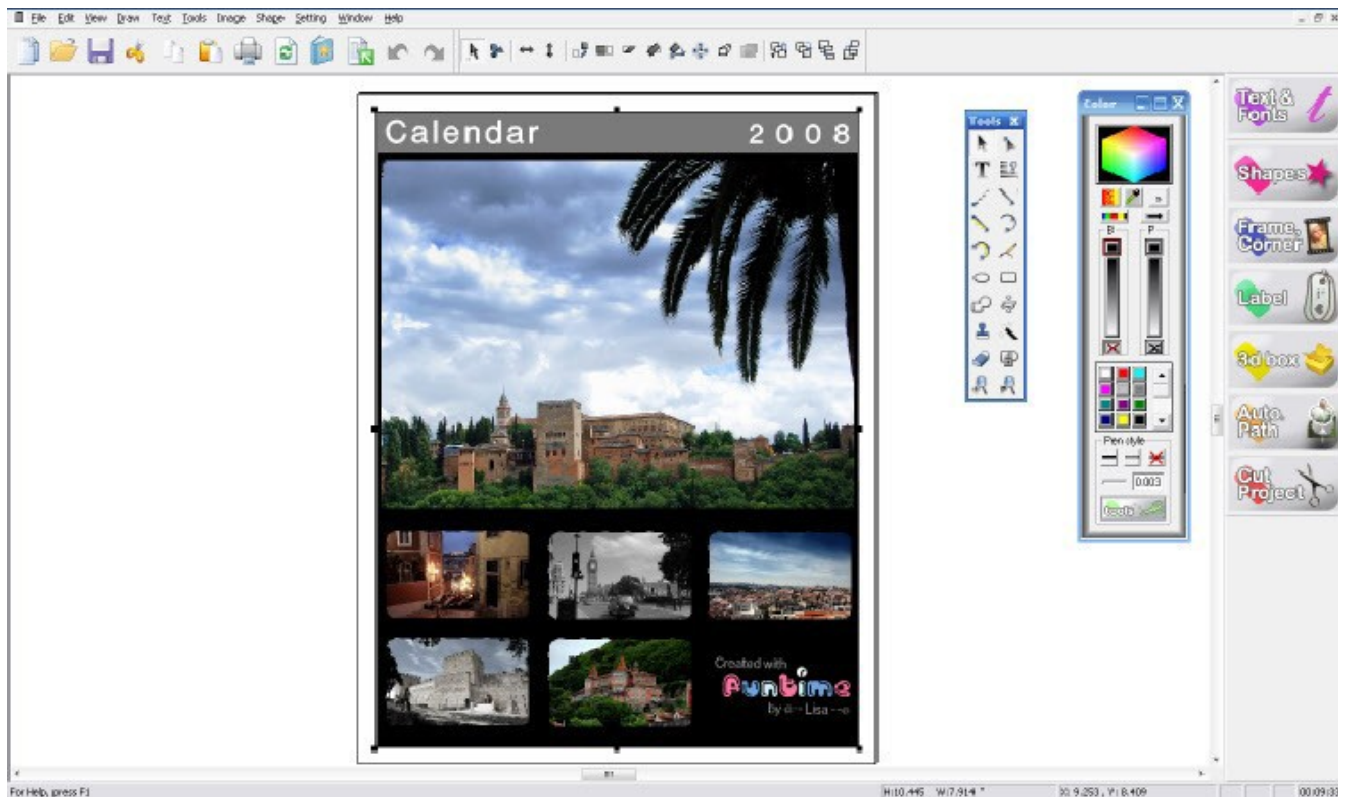

STEP 2

To erase all the glitches look a the top menu bar and click on “REDRAW” function.

Final result

You have now your original design without any glitches.
